

Owner Managed Businesses are widely regarded as the backbone of the UK economy. They come in all shapes and sizes and trading entities, ranging from sole traders, partnerships, limited liability partnerships and limited companies employing sometimes just two or three staff, sometimes hundreds. They cover a vast range of enterprises - manufacturing, services, retail, technology, leisure, to mention just a few.

At Band Hatton Button, we are very conscious of the needs of Owner Managed Businesses and know that access to accurate and practical legal advice, often at short notice, is very important. We want our Owner Managed Business clients to think of us as not just there to provide legal advice, but also as trusted friends and business advisors who recognise the practical needs of your business.

We have identified 'Owner Managed Businesses' as one of our key sectors and as part of this are organising an event aimed at such businesses. The event will be an informal session with key lawyers from the firm available to chat through any issues you may be facing.

We are also delighted that Craig Humphrey, Managing Director of CWLEP GrowthHub, will also be joining us (www.cwgrowthhub.co.uk).

Date
